TrojanEnergy

Trojan Home

Trojan Home

How does it work

Underground cabling & kerbside charger managed by Trojan Energy

Connected directly to the household energy supply via consumer unit

Discreet wall box with MIR-qualified meter, cloud connection, Method 3 & 1B protection (IET01:2024), load control, Smart Charging Regs compliance

Plug & Go charging for host via adaptor (£50/month subscription)

PAYG charging available to other local residents

Trojan Home

Council Benefits

Trojan liability insurance

Auditable installation and simultaneous contact assessment with Method 3 & 1B protection

Maintenance included, no planning permission required

Trojan-managed installs (6 hrs) & utility map updates

Trojan Home

Resident Benefits

Affordable – No upfront cost, up to ~50% cheaper than public charging

Flexible – Use your home tariff at any Trojan charger

Reliable – Insurance, 24/7 support & monitoring and annual checks included

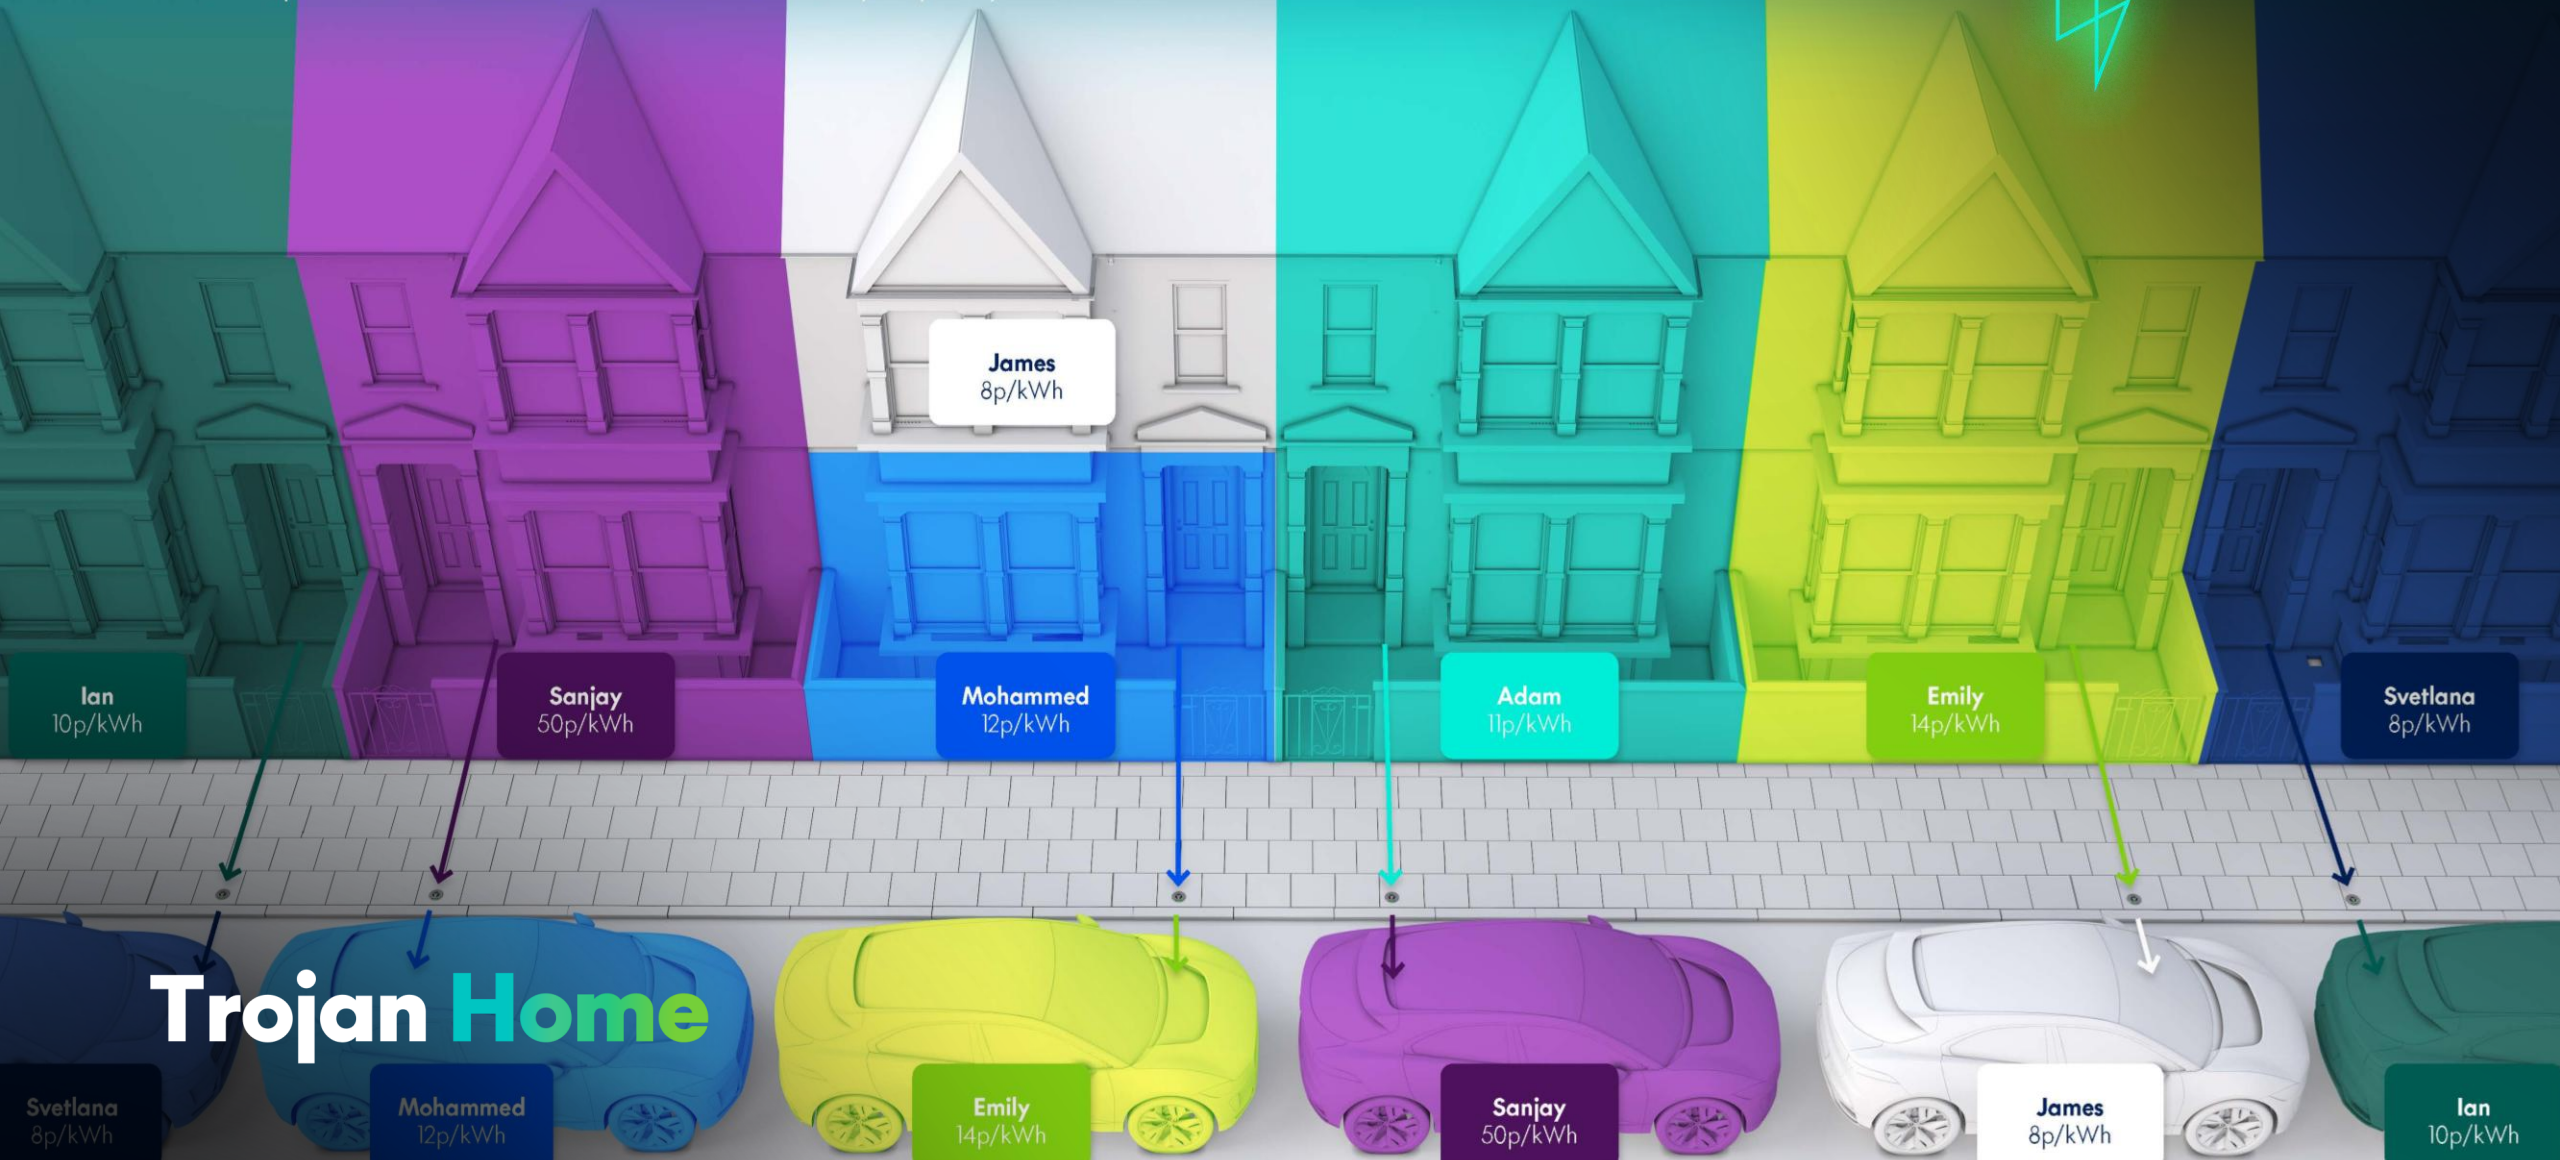

Accessible & future-ready – Best for disabled drivers, versatile layouts, no planning permission, V2H compatible

Trojan Home

TROJAN HOME VIRTUAL DRIVEWAY*

Subscribers can charge at their own home domestic rate, even if the Trojan Home is not connected to their property

Trojan Home

9 Trojan Home Council projects live

20+ in the pipeline

Expanding beyond councils

Proven at scale

"Just wanted to say thanks for how smooth everything went with the charger install. All the team from the electrician to the technicians were very professional and conscientious. It was very impressive"

Tom W - Kent Resident

"When I switched to an EV with Addison Lee, I needed charging to be simple and reliable. Now I just plug in after work and by morning it's fully charged. This solution is effortless and works perfectly for me."

Hector - Addison Lee Driver
